All École Polytechnique courses are highly selective, apply a multidisciplinary scientific approach, and are closely involved with research.

### BACHELOR’S DEGREE

- **3-year undergraduate program**, taught in English
- Curriculum focused on mathematics and computer science, with double majors available in 2nd and 3rd years
- Program designed for French and international students with strong potential and ability to cope with a demanding course load
- Admission based on application file and interview

### OUTCOMES FOR POLYTECHNICIENS GRADUATES

- 24% DOCTORAL STUDIES/PHD
- 15% CIVIL SERVICE
- 4% ENTREPRENEURSHIP
- 5% OTHER
- 52% COMPANIES AND ORGANIZATIONS

### INGÉNIEUR POLYTECHNICIEN

For over 150 years, “l’X” (pronounced “lix”) has been widely used as a nickname for École Polytechnique among students and in the general public in France.

- Highly selective multidisciplinary scientific program lasting 4 years
- Personal development, military and sports training
- Strong elements of humanities and social sciences
- **3 internships** (an internship in the armed forces or a civil organization, an internship in a company, and a research internship)
- International exposure
- Concentrations available from Year 3
- Admission via a competitive exam following the French Classe Préparatoire foundation degree, a French Licence, or an equivalent degree (Bachelor)
Graduate Degree
- Two-year Science and Engineering programs, exclusively taught in English
- High-level scientific studies including modules in humanities and social sciences
- Close industry collaboration for real-world education
- Programs include:
  - Big Data For Business (joint degree with HEC)
  - Connected Objects for a Digitized Society
  - Corporate Strategy for New Markets
  - Energy Environment: Science Technology and Management
- Entry-level requirement: Bachelor’s degree

Master's Degree - Université Paris-Saclay
- 40 tracks are available at École Polytechnique in 13 different concentrations
- Master's degree delivered by Université Paris-Saclay
- Admission based on application form following a French Licence or Bachelor’s degree

PhD program
- 5-year program in association with the École Polytechnique Research Center, in order to attract the best international students
- Research-focused program (2-year Master’s degree and 3-year PhD)
- Personalized and demanding scientific studies, accompanied by attractive financial conditions (grant available to fund the first two years of the Master’s program + financial support for the 3 years of PhD)

OUTCOMES FOR MASTER’S GRADUATES
- 55% Doctoral Studies/PhD
- 35% Companies and Organizations
- 5% Entrepreneurship
- 5% Other

OUTCOMES FOR PHD GRADUATES
- 18% Postdoctoral Fellowship
- 32% Higher Education and Research
- 39% Companies and Organizations
- 11% Administration, Education, and Others

École Polytechnique runs "Interface", one of Université Paris-Saclay’s 10 Doctoral Schools where PhD students from the Research Center are now enrolled.

École Polytechnique Executive Education is based on the multidisciplinary approach that characterizes teaching and research at l’X, in order to offer courses based on its scientific and technical expertise, degree and certification programs, and short and customized courses. This offer, designed by professors of École Polytechnique, is based on the excellence of research conducted in the Research Center.
École Polytechnique’s research strategy combines the production of fundamental knowledge with the development of solutions to applied, technological and societal issues.

At the service of knowledge and society

Thanks to excellent fundamental research in tune with societal issues, École Polytechnique creates strong links with the corporate world, from small businesses to major French and international groups. Researchers can therefore learn about companies’ needs to propose innovative and effective concepts and create new knowledge using very advanced tools for theory, numerical simulation, and experimentation.

**École Polytechnique’s ambitious research strategy is implemented by the École Polytechnique Research Center with 22 laboratories, 21 of which are joint research units with the CNRS, co-mentoring with other national bodies (CEA, INRIA, Inserm) or local bodies (Université Paris-Sud, ENSTA ParisTech and UPMC, etc.)**

**RESEARCH IN NUMBERS**

| **22** research laboratories | **1,600** research staff, including **500 PhD students** | **1,350** papers published per year, of which **60% are in collaboration with international laboratories** |

**8 MAJOR FIELDS OF RESEARCH**

- Nanoscience, Innovative Materials and Efficient Processes
- Energy, Transportation and Environment
- Bioengineering, Biology and Health Sciences
- Matter and Light in Extreme Conditions
- Universal Laws and Structures
- Concepts and Methods for a Digital Society
- Modeling and Optimization of Complex Systems
- Markets, Innovation and Science-Society Relations
Educating those who will imagine and run the economy of tomorrow, École Polytechnique inspires innovative spirits and encourages its students and researchers to be entrepreneurial. It strongly supports entrepreneurs in their startup projects.

Introducing and preparing for entrepreneurship

Inspiring an entrepreneurial spirit in its students, École Polytechnique provides multiple opportunities to meet startup founders, to learn about industry issues and the challenges of tomorrow, and to get involved in startup projects. As a fully engaged institution, l’X develops training courses in entrepreneurship and innovation.

Supporting startups

Internationally-minded, and with the active involvement of its students and Research Center, École Polytechnique has created support services to help create innovative startups: the X-UP accelerator and the X-Tech incubator. In this way, l’X encourages the development of projects with strong potential.

LA FIBRE ENTREPRENEUR

Drahi - X Novation Center

- An internal Center to encourage entrepreneurship and innovation within École Polytechnique
- Total area of 2600 m²
- A unique space for business acceleration (X-UP) and incubation (X-Tech), teaching, creating, experimenting and prototyping (X-FAB), as well as contact with investors and collaboration with the industry
École Polytechnique develops partnerships with companies and facilitates the transfer of its scientific and technological results to businesses.

Hands-on professional experience

- Internships in France or overseas available to students each year
- Research subjects proposed by companies for student projects
- Research subjects proposed by companies for PhD candidates as part of CIFRE contracts

Supporting academics and research

- 20 Academic and Research Chairs
- 28 partner companies for these chairs

L’X promotes collaboration between teaching and research, in particular through the appointment of teaching and research chairs covering various subject fields: energy, biomedical, materials, modeling and digital science, sustainable development, management, innovation, economy and finance.

Promoting innovation

École Polytechnique contributes to economic development by promoting the technological expertise and inventions of its Research Center.

THE ÉCOLE POLYTECHNIQUE FOUNDATION (FX)

Created in 1987, the role of the Foundation is to help École Polytechnique, its students and its faculty to build closer relations with the corporate sector.

THE FOUNDATION AIMS TO:

- fund École Polytechnique’s development
- help develop innovation in teaching
- develop research and the transfer of advanced technologies to French industry
- contribute to the promotion of École Polytechnique in France and overseas
- help students discover the corporate world

THE 1ST FUNDRAISING CAMPAIGN (2008-2013):

35.2 M€ raised in donations, bequests and individual contributions

ASSOCIATION OF ALUMNI AND GRADUATES (AX)

The purpose of AX is to create and develop links of solidarity and friendship among the 25,000 alumni.

It provides grants, helps welcome international students and supports efforts to provide equal opportunities. It also organizes meetings, conferences, colloquia, and events open to a wide audience.

SUPPORT AS OF 31 MARCH 2016:

4,043 Donors
227 Major Donors
40 sponsor companies
13 class gifts

500 patents in our portfolio

École Polytechnique contributes to economic development by promoting the technological expertise and inventions of its Research Center.
École Polytechnique actively encourages student mobility, cultivates strategic partnerships with world-class institutions and develops the international outlook of its programs and Research Center.

Strategic partnerships to encourage exchange between students, teachers and researchers

Developing international relations has long been a core strategy of École Polytechnique: international students started attending classes as early as 1798. With over 200 agreements, l’X has a large network of partner universities across the globe. Its academic and scientific collaborations provide exceptional opportunities for incoming and graduating students. École Polytechnique now focuses its approach to strategic partnerships on around twenty world-class universities, encouraging contact with the corporate world and valuing innovation and entrepreneurship.

INTERNATIONAL SCOPE IN NUMBERS

30% of students are international
Over 60 nationalities
32 double degrees
Exam centers in across 15 countries,

A world-class environment for international students

École Polytechnique guarantees its international students a unique experience. From the day of their admission to post-graduate career guidance, l’X supports them through counseling, administrative and financial support and mentoring from former students. This unique environment, combined with the excellence of students chosen through a highly selective process, attracts the best international teachers.
A campus in an exceptional environment

Just 20 km south of Paris, the École Polytechnique campus covers 160 hectares, on which students create numerous initiatives to organize cultural, artistic, social and sports activities through their student organizations.

Campus life is vibrant and offers a wide range of events, including scientific seminars, shows, exhibitions, etc. Events are open to the public: Science Fair, Heritage Days, conferences, etc.
