APPLICATION REQUIREMENTS AND DEADLINES

Applicants must hold or expect to hold an undergraduate degree in Economics, Mathematics, Civil Engineering and/or Transportation Studies prior to the beginning of the program. In order to submit an application, applicants must also supply the following:

- Copies of degrees and transcripts of all previous higher education
- 2 academic references, at least 1 from your current institution
- Personal statement & CV or resume
- A minimum IELTS score of 6.5 or a TOEFL iBT score of 90 (please consult our website for information about exemptions)
- GRE scores are not required but will be considered if provided.

No paper copies are needed for the admission process. Applications are reviewed in rounds, 3 times a year. Applying early improves your chances.

The application deadlines for the Fall 2018 intake are:
- > January 7, 2018
- > March 18, 2018
- > May 6, 2018

Decisions will be released 4 to 6 weeks after each application deadline.

For more information, visit our website portail.polytechnique.edu/graduatedegree or contact our admissions team at gdadmissions@polytechnique.fr

FEES AND FINANCING

Application fee: 80 €
Tuition fees: 12,000 € per year

For information concerning financing and scholarships please consult our website: https://portail.polytechnique.edu/graduatedegree/smartcities
Ecole Polytechnique’s full-time graduate degree programs are industry oriented and combine state-of-the-art multidisciplinary education and in-depth scientific knowledge. These two-year programs, taught entirely in English, are designed for highly-qualified undergraduates with a strong quantitative background in Science, Engineering and Economics depending on the programme.

140 ECTS credits are achieved during the degree program, which results in an internationally recognized academic qualification.

Industry collaboration for real-world education

Now more than ever, employers favor graduates who can bring real-world experience and perspectives to their organization from day one. Our programs will help you:
- develop a broad understanding of your future professional industry,
- build your professional network,
- enhance your practical and soft skills,
- significantly increase your marketability to potential employers.

Academic courses are developed and delivered by world-class faculty from École Polytechnique, associated Research Centers, national and international academic partners as well as by top-level industry professionals.

The Graduate degree programs also include company visits and conferences held by leading figures in business. Individual and team projects and the internships can be undertaken in collaboration with one of our many industrial partners, in France or abroad.

High-level research combined with innovation management know-how

In order to prepare you to take on leadership positions in technology-driven organizations, we think that you first need to understand the frontiers of technology and know-how to build bridges between research and the corporate world. You will learn to combine fundamental research, technology application and development, and innovation management.

Ecole Polytechnique’s Research Center includes 22 world-class scientific departments in 8 major fields addressing today’s most pressing social and technological challenges through interdisciplinary and cross-functional projects. Most of them are joint research units with the world-renowned French National Center for Scientific Research (CNRS). As part of your course, you will have the opportunity to work on cutting-edge research guided by some of the most distinguished faculty in the world.

Innovation, Management and Entrepreneurship

In addition to our laboratories, you will also have access to our Entrepreneur and Innovation center, a unique startup environment comprising an incubator, an accelerator, a prototyping area and diverse co-working spaces. This center allows us to offer our Graduate Degree students a curriculum that integrates science and engineering with leadership, innovation, entrepreneurship and core management concepts.

Career Services

Ecole Polytechnique provides careers advice and support throughout the program, ranging from helping you define your professional goals to making competitive job applications and excelling at interviews! Workshops on writing CVs, information sessions on job search strategy, networking events, and an annual job fair are among the many services that we offer.

Program Structure

The Smart Cities and Urban Policy program emphasizes hands-on, experimental learning by inviting you into the worlds of research and industry, notably through four to six-month internships.

In an increasingly global economy, metropolitan areas are basic components of economic competition and growth. Capital, labor pools, knowledge, infrastructures and their distribution within and across geographical space play a major role in the economic development and prosperity of metropolitan areas.

They tend to be the main generators of economic prosperity and a breeding ground for innovative tech companies. Through tactical urbanism plans and development strategies, perpetually booming metropolitan areas are seeking to become smart and sustainable places. They are looking for efficient ways to optimize their full potential and successfully transition into «cities of the future».

The Smart Cities and Urban Policy Graduate Degree program provides an in-depth understanding of new and transforming metropolitan areas and their competitive environments.

Following the Ecole Polytechnique’s tradition of excellence in combining science and engineering with leadership, innovation, entrepreneurship, and social responsibilities, this program provides a unique approach to professional training, accounting for the full potential and successfully transitioning into «cities of the future».

Industry Partners

The professional orientation of the program is strengthened by the strong and mutual ties with industrial and institutional partners from various and relevant fields: real estate, finance, energy, international organizations and ministries.
