APPLICATION REQUIREMENTS AND DEADLINES

Applicants must hold or expect to hold an undergraduate degree in Engineering Science, Mechanical Engineering or Physics prior to the beginning of the program. In order to submit an application, applicants must also supply the following:

• Copies of degrees and transcripts of all previous higher education
• 2 academic references, at least 1 from your current institution
• Personal statement & CV or resume
• A minimum IELTS score of 6.5 or a TOEFL iBT score of 90 (please consult our website for information about exemptions)
• GRE scores are not required but will be considered if provided.

No paper copies are needed for the admission process. Applications are reviewed in rounds, 3 times a year. Applying early improves your chances.

The application deadlines for the Fall 2018 intake are:
> January 7, 2018
> March 18, 2018
> May 6, 2018

Decisions will be released 4 to 6 weeks after each application deadline.

FEES AND FINANCING

Application fee: 80 €
Tuition fees: 12,000 € per year

For information concerning financing and scholarships please consult our website: https://portail.polytechnique.edu/graduatedegree/steem
Ecole Polytechnique’s full-time graduate degree programs are industry oriented and combine state-of-the-art multidisciplinary education and in-depth scientific knowledge. These two-year programs, taught entirely in English, are designed for highly-qualified undergraduates with a strong quantitative background in Science, Engineering and Economics depending on the programme.

Industry collaboration for real-world education

Now more than ever, employers favor graduates who can bring real-world experience and perspectives to their organization from day one. Our programs will help you:

• develop a broad understanding of your future professional industry,
• build your professional network,
• enhance your practical and soft skills,
• significantly increase your marketability to potential employers.

Academic courses are developed and delivered by world-class faculty from Ecole Polytechnique, associated Research Centers, national and international academic partners as well as by top-level industry professionals. The Graduate degree programs also include company visits and conferences held by leading figures in business. Individual and team projects and the internships can be undertaken in collaboration with one of our many industrial partners, in France or abroad.

High-level research combined with innovation management know-how

In order to prepare you to take on leadership positions in technology-driven organizations, we think that you first need to understand the frontiers of technology and know-how to build bridges between research and the corporate world. You will learn to combine fundamental research, technology application and development, and innovation management.

Ecole Polytechnique’s Research Centers include 22 world-class scientific departments in 8 major fields addressing today’s most pressing social and technological challenges through interdisciplinary and cross-functional projects. Most of them are joint research units with the world-renowned French National Center for Scientific Research (CNRS). As part of your course, you will have the opportunity to work on cutting-edge research guided by some of the most distinguished faculty in the world.

Innovation, Management and Entrepreneurship

In addition to our laboratories, you will also have access to our Entrepreneur and Innovation Center, a unique startup environment comprising an incubator, an accelerator, a prototyping area and diverse co-working spaces. This center allows us to offer our Graduate Degree students a curriculum that integrates science and engineering with leadership, innovation, entrepreneurship and core management concepts.

Career Services

Ecole Polytechnique provides careers advice and support throughout the program, ranging from helping you define your professional goals to making competitive job applications and excelling at interviews! Workshops on writing CVs, information sessions on job search strategy, networking events, and an annual job fair are among the many services that we offer.

The Energy Environment: Science Technology and Management (STEEM) graduate degree program fosters real-world technical expertise at the intersection between environmental issues and the future of energy. In Ecole Polytechnique’s grand tradition of multidisciplinary education, this professionally-oriented program provides in-depth understanding of the scientific, economic and industrial context of renewable energy and the environment.

The STEEM program combines management experience with first-class engineering and scientific training, making our graduates highly sought after. The numerous industrial and research partnerships within this degree program ensure students will be suited to meet the 21st century’s energy and environmental challenges within a variety of sectors including industry, start-ups and public organizations. For photovoltaics you will take advantage of the new world major R&D institute IPV close to the campus.

Industry Partners

Each year, more than 20 scholarships are awarded to the best candidates by STEEM’s industrial partners (including TOTAL, EDF, Schneider Electric, Saint Gobain, General Electric, RTE, etc.). Scholarships can either take the form of a partial or full tuition fee waiver, or a stipend covering part of living expenses. Students from Morocco can benefit from the specific agreement with IRESEN.
